

INFORMATION SHEET AND CONSENT FORM

Project title: TRIPLE -TRANSFORMING RESEARCH THROUGH INNOVATIVE PRACTISES FOR LINKED INTERDISCIPLINARITY EXPLORATION

Researcher name(s): Dr Paula Forbes

What is the research about?

We invite you to help us with the research for the TRIPLE project <https://www.gotriple.eu/>. We are conducting Co-Design sessions with a number of researchers from across Europe. The sessions will help us better understand what are the needs of the end-users of the platform we are building.

Our project deals with Social Sciences and Humanities (SSH) research and our goal is to build a digital platform supporting the discoverability of new information, data and contacts.

The SSH research fields are divided across a wide array of disciplines and languages. While this specialization is definitely important in these research fields it also leads to a fragmentation that prevents SSH research from reaching its full potential. Use and reuse of SSH research is low, interdisciplinary collaboration possibilities are often missed, and as a result, the societal impact is limited. Our project, TRIPLE, seeks to address these issues: it enables researchers and other stakeholders to discover and reuse SSH data, but also other researchers and projects across disciplinary and language boundaries.

This project has received funding from the European Commission, H2020 programme (Project Number: 863420).

Do I have to take part?

This form has been written to help you decide if you would like to take part and participation is entirely voluntary. It is up to you and you alone whether you wish to take part. If you do decide to take part you will be free to withdraw at any time without providing a reason and without penalty.

What will I be required to do?

You will participate in **an online Digital Co-Design session using Miro**. Using an online whiteboard tool (Miro) to help us understand your professional work and the digital tools you use as part of your work. The Co-Design session will help us in understanding the needs of potential TRIPLE users and in the subsequent design of platform. We anticipate that the session will be approximately 45 minutes. The session will be recorded for later analysis. Recordings will only be viewed by the people involved in this research activity and will only be used for the purpose of the proposed research activity. We may use screen-shots of the whiteboard for reports/publication etc but we will not use your image/audio for this purpose.

Reward

There is no reward for participating in this session.

How will you handle my data?

Your data will be stored in an pseudonymised form and will only be accessible to the research partners of TRIPLE [the research contact person is Dr. Stefano De Paoli, s.depaoli@abertay.ac.uk, phone: +441382308446]. This means that a key stored separately will link your research data to your real identity. Your data will be stored in the Abertay University Secure Research Servers, with data fully anonymised at the earliest opportunity (i.e. when data that could identify you is no longer necessary for the purposes of the research). Your responses are treated in the strictest confidence - it will be impossible to identify individuals within a dataset when any of the research is disseminated (e.g. in publications/presentations). Abertay University acts as Data Controller (DataProtectionOfficer@abertay.ac.uk).

Retention of research data

Researchers are obliged to retain research data for up to 10 years' post-publication, however your anonymised research data may be retained indefinitely (e.g., so that researchers engage in open practice and other researchers can access their data to confirm the conclusions of published work). Consistent with our data retention policy, researchers retain consent forms for as long as we continue to hold information about a data subject and for 10 years for published research).

Consent statement:

Abertay University attaches high priority to the ethical conduct of research. Please consider the following before indicating your consent on this form. Indicating your consent confirms that you are willing to participate in the research, however, indicating consent does not commit you to anything you do not wish to do and you are free to withdraw your participation at any time. You are indicating consent under the following assumptions:

- I understand the contents of the participant information sheet and consent form.
- I have been given the opportunity to ask questions about the research and have had them answered satisfactorily.
- I understand that my participation is entirely voluntary and that I can withdraw from the research (parts of the project or the entire project) at any time without penalty and without having to provide an explanation.
- I understand who has access to my data and how it will be handled at all stages of the research project.

Please tick (X) the boxes	Yes - I do consent	No - I do not consent
I consent to take part in this study conducted by the TRIPLE project who intend to use my data for further research on the design of the TRIPLE platform		
I consent that the recordings of the session can be used for the purpose of analysis and research		
I consent that the data could be used in completely anonymised form in scientific publications or presentations		

I confirm that I am willing to take part in this research

Privacy notice and legal basis for processing:

Abertay University (the "University"/"we") is committed to protecting the privacy and security of your personal data in accordance with the Data Protection Act 2018 (or any successor legislation) and (EU) 2016/679 the General Data Protection Regulation ("GDPR") (and any other directly applicable EU regulation relating to privacy) (together "Data Protection Law"). This research has been approved by the Ethics Committee of Abertay University. The research team adhere to the principles of the General Data Protection Regulations (GDPR). The Abertay University Privacy Notice for Research Participants is available at <https://www.abertay.ac.uk/legal/> . General information on Data Protection law is available from the [Information Commissioner's Office](#).

For research involving living humans, the Data Controller adheres to, and collects, processes and handles/archives data in compliance with:

Article 6 (1) e: processing is necessary for the performance of a task carried out in the public interest or in the exercise of official authority vested in the controller.

Article 9 (2) j: processing is necessary for archiving purposes in the public interest, scientific or historical research purposes or statistical purposes in accordance with Article 89(1) based on Union or Member State law which shall be proportionate to the aim pursued, respect the essence of the right to data protection and provide for suitable and specific measures to safeguard the fundamental rights and the interests of the data subject.

Where applicable, this form is prepared in consultation with Article 13 of EU GDPR legislation, detailing the information to be provided where personal data are collected from the data subject.

If you have concerns about this research, please contact researchethics@abertay.ac.uk for enquiries (stage 1), or for more formal concerns (stage 2), please contact complaints@abertay.ac.uk. If you are not happy with the way your information is being handled, in the first instance, you should contact the University's Data Protection Officer (DataProtectionOfficer@abertay.ac.uk). If you remain unhappy with the response received from us, you have the right to lodge a complaint with the Information Commissioner's Office at Wycliffe House, Water Lane, Wilmslow, SK9 5AF (<https://ico.org.uk/>).
