

gotriple.eu

GoTriple is...

an innovative multilingual discovery solution for the social sciences and humanities (SSH). It provides a central access point for discovering research artefacts that are relevant to the wide variety of disciplines under the umbrella domain of SSH: publications and research data, project descriptions and researcher profiles. These are automatically harvested from aggregators, semantically enriched and linked in GoTriple. Users will also have access to a number of additional innovative tools and applications.

As of October 2021, GoTriple BETA offers...

Watch the GoTriple video:

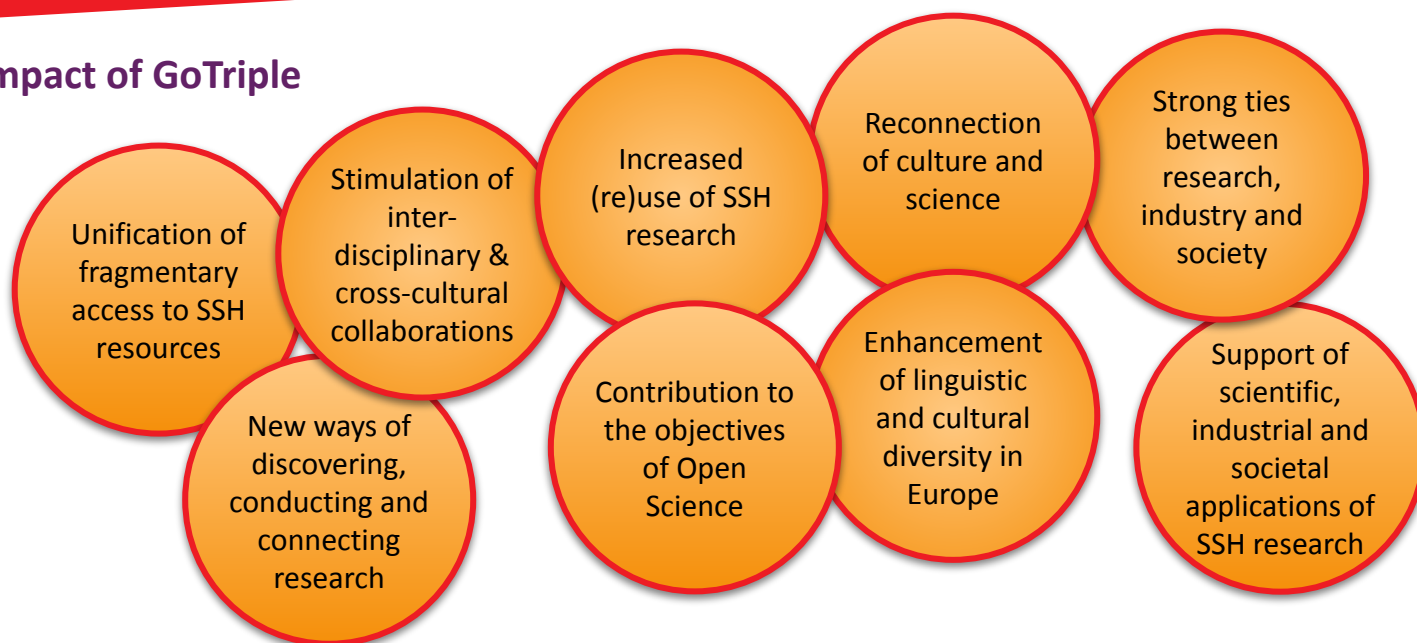

ogy.de/ocxh

GoTriple allows you to...

- Browse, find, access and reuse scholarly SSH resources currently scattered across local, language- and discipline-specific repositories
- Visualise your search results
- Get personalised recommendations
- Annotate web documents
- Find and connect with other researchers and projects across disciplinary, cultural and language boundaries
- Explore new ways of funding research

Impact of GoTriple

Things to come in 2022

- Evolved stable front and back end
- Sign-on feature to create a user account
- Addition of national and European aggregators, including DOAB, Europeana and EKT, to complement Isidore, DOAJ, OpenAIRE
- Harvesting of platforms such as CORDIS and ORCID to include research projects and researcher profiles
- Process to avoid duplication of items
- Plug-in of eTranslation API to enable automated and curated translation of titles and abstracts into English
- Integration of more innovative services & tools: Annotation System, Trust Building System, Crowdfunding Platform, in addition to the Visual Discovery and Recommender System

open scholarly communication in the european research area for social sciences and humanities

GoTriple is developed as part of TRIPLE, a project financed under the Horizon 2020 Framework Programme “Developing the European research infrastructures for 2020 and beyond” with approx. 5.6 million Euros for a duration of 42 months (2019–2023). TRIPLE, which stands for “Transforming Research through Innovative Practices for Linked Interdisciplinary Exploration”, consists of a consortium of 21 partners from 13 European countries.

GoTriple will be the Discovery Service of OPERAS, the Research Infrastructure supporting open scholarly communication in the social sciences and humanities in the European Research Area, and it is designed to be integrated into and thus to enrich the services of the European Open Science Cloud (EOSC) for the SSH communities.
